

**Go Digital for Meetings & Conferences
with this Management Software**

XCONFERENCE is a Multimedia Conference Software, which integrates conference control and Chairman-Delegate interaction. It is designed to provide an instant audio/visual resource sharing between the chairman and the delegates in the most secured way possible.

XCONFERENCE helps to share and transfer private and confidential data in a very safe and secured manner. The chairman can fully control the delegates' machine from recording the conversations in a group to sharing the data either ways. It is currently compatible with LAN versions to suit different requirements of modern conduct of business meetings.

Applications:

- Screen Broadcast
- File transfer
- Audio and video based interaction
- Lock/unlock screen & keyboard
- Group Discussions

SUN **TECH**
SUN -TECH I.T. Solutions Limited

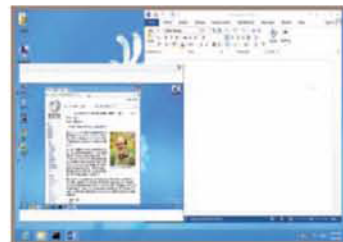

Chairman Show

- Chairman PC can broadcast his screen and share data to the delegate PC. The chairman can chose selected delegates or all the delegates to participate.

Remote Aid

- Chairman can send a remote command or help the delegates to start/open a particular content easily; it even can reboot, shut down, logout, and login one or more delegates' PCs remotely.

Delegate Monitor

- Chairman can monitor delegates' screens instantly to manage data sharing or viewing

Delegate Show

- Chairman can select a delegate and share his screen to selected or all the delegates' PCs.

Chairman Voicecast

- The chairman can transmit his voice to all the delegates when he wants to give an instruction or lecture on a topic

Intercom

- The chairman can connect one to one with the delegate and clear off the air if any clarifications required

Interpretation System

- Here the chairman can allocate the delegates in separate groups and have a discussion within a group as per the convenience

AV LIVE

- Real-Time capturing and broadcasting of multiple analog videos from external AV equipment, including DVD, VHS TV and DV-CAM without delay
- Support USB capture devices or PCI/PCI-E capture cards

XPLAYER

- Allow teacher to broadcast 9 different videos at the same time
- Student's work can also be broadcasted to the class
- Compatible with the most popular audio and video files formats, including MP3, WMA, AVI, WMV, MP4, MKV, MPEG, etc.
- Support DVD broadcasting

File Transfer

- Transfer or collect files from student PCs
- File sending and receiving notification and log report is included
- Inter-group file transfer is allowed

Survey Model

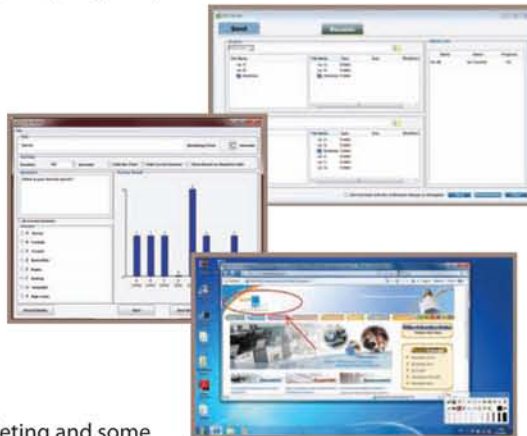

- Allow chairman to easily arrange an instant voting or raise a short question to assess and evaluate delegates' thoughts

Black & Lock Screen

- Blackout the screen of delegates' PCs and lock the keyboard and mouse

Whiteboard

- The Whiteboard is a marker tool. It provides tools of drawing, typing, editing, deleting and some useful functions for presentation.
