

**Conduct advance and effective trial with this
Judiciary Management Software**

e-PRESENTATION
Advance And Effective Judiciary System

e-PRESENTATION is a boon to conduct a trial in Court Room. In today's world, sharing and transferring data can cause several outrages. e-Presentation helps to share and transfer private and confidential data in a very safe and secured manner which in turn strengthens the judiciary system. There are plenty of other useful features with this software that helps to conduct the proceedings smoothly.

Moreover, it also supports video and audio based interaction that allows presenter and audience to demonstrate effectively.

e-PRESENTATION is currently compatible with LAN or WIFI versions to suit different requirements of modern Judiciary System.

Highlights:

- Screen Broadcast
- Audio and video based interaction
- Messaging and lock / unlock screen & keyboard
- Data Encryption Communication
- PC power management

Presenter Show

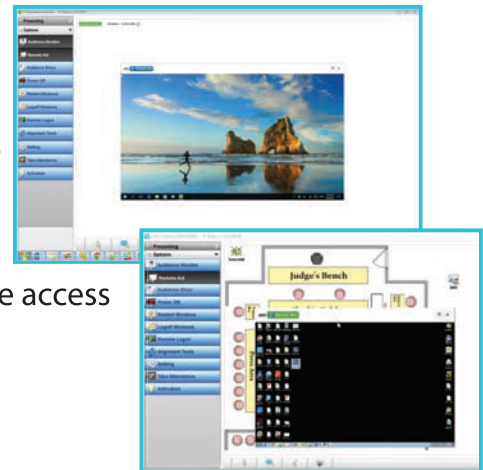

- Presenter Show is one of the major functions in e-Presentation System. With this feature, Presenter can share multimedia information on screen to any Audience, a selected group of Audiences or all Audiences in real-time.

Presenter Recorder

- The Presenter can record the desktop activity using the Presenter Recorder. The recording will be in video format and can be saved for reference.

Audience Monitor

- Presenter can view Audience's screen real-time through Presenter in full screen mode or in multiple-window mode

Remote Aid

- Presenter can take control of audience's PC which eases the access to data and provide assistance to others.

PC power management

- PC power management has features such as switch on (wake up), shut down (power off), log off and restart (reboot) a single, a group of PC and all PCs in the e-Presentation system network. Presenter can select the targeted Audience from the seating plan.

Alignment Tools

- This tool is for Presenter to change the layout of the seating plan by using buttons to align the icons in the seating plan.
