LATEST DEVELOPMENT IN XCLASS MULTI-PLATFORM

Recently, we received some feedback from our valuable clients about XCLASS. To better enhance the user interface, we made the following changes for iOS system and Android system.

• **iOS Teacher** has been under-development with key features like Teacher Show, Student Monitor, Messaging, Survey, File Transfer and other interesting features.

• **iOS Student** allows Teachers to monitor when students open a document/picture within the XCLASS.

• **Android Teacher** is under-development.

• **Android Student** devices rooted is not required. The teacher can monitor student screen without rooting the device.

X-CONFERENCE

We, Sun-Tech, had shown a proven track records of educational technology products in Hong Kong and International education market for almost 20 years. Aside from

maintaining our professionalism in education market we are working on expanding our product line in the commercial market. This new product named X-CONFERENCE. This product is specially designed for corporations to conduct meetings with ease. Users can share each other's screen, send messages, transfer file, and form groups to have discussion. We believe this software ease the conference process and reinforce each staff productivity.

STEM Education

To better prepare students for the rapid economic, scientific and technological developments ahead, STEM education is being promoted as a key emphasis in the ongoing renewal of the school curriculum in Hong Kong that is essential for their lifelong learning and whole-person development. On April 20, 2017, The Hong Kong Association for Computer Education organized a competition for the event - IT Elite 2017. The competition took place at Hong Kong Cyberport. The competition consists of different skills tests such as computer programming and computer technical knowledge. The purpose of the competition aim to develop the interest in information technology and show the creativity and determination. We, Sun-Tech, are proud to be one of the exhibitors to educate students about the latest technology, moreover, we demonstrated and provided some experiments in order to unleash their potential in innovation during the event. Last but no least, Congratulations for the award-winning students.
